PREFACE

The original edition of this bibliography was compiled and distributed to all Manitoba schools in order to make quality Canadian materials known to teachers, librarians and administrators. It was felt, and subsequent surveys have shown, that Canadian school libraries are lacking in Canadian content. While Canadian materials suitable for some subject areas are still limited in quantity, the publication of IN SEARCH OF CANADIAN MATERIALS and this SUPPLEMENT is proof of the fact that more and more quality materials are now becoming available.

Above all remember that this is a SELECTION AID designed to help you PURCHASE materials for your school library. Grade levels, particular suitability, and prices are indicated for each item. Please ensure that all teachers have the opportunity to use it when they are considering new materials for their subject areas.

The Department of Education Library has copies of the majority of items listed in the bibliography. Teachers and librarians are encouraged to either come in and examine the materials, or if this is not possible, to request that a display of materials be arranged for your school.

ACKNOWLEDGEMENTS

The Department of Education is indebted to Donna Phillips who once again has done an excellent job of searching out, evaluating and annotating the items in this supplement to In Search of Canadian Materials.

PREFACE

The orginal edition of this bibliography was compiled and distributed to all Manitoba schools in order to make quality Canadian materials known to teachers, librarians and administrators. It was felt then, and has since been shown to be true, that Canadian content is lacking in Canadian school libraries. Although Canadian materials suitable for some subject areas are still limited in quantity, the publication of IN SEARCH OF CANADIAN MATERIALS and this SUPPLEMENT is proof of the fact that more and more quality materials are now becoming available.

This is a SELECTION AID designed to help in the PURCHASE of materials for your school library. Grade levels, particular suitability, and prices are indicated for each item. All those involved in ordering materials should have an opportunity to use it.

The Department of Education Library has copies of most of the items listed in the bibliography. Teachers and librarians are encouraged to either come in and examine the materials, or if this is not possible, to request that a display of materials be arranged for your school.

ACKNOWLEDGEMENTS

The Department of Education is indebted to John Pampallis who has done an excellent job of searching out, evaluating and annotating the items in this supplement to In Search of Canadian Materials.
